SUMMARY

- As a software developer with 3 years of experience, my responsibilities include eliciting and defining application requirements from clients.
- I excel in utilizing JavaScript, React.js, TypeScript, Next.js, Node.js, MS SQL to craft robust applications.
- I also have experience with Git for version control and frontend testing frameworks like Jest and Cypress.
- Furthermore, I am adept at leveraging Jira and Confluence for efficient requirement management.

WORK EXPERIENCE

Chenoa Information Services

Portfolio Analysis Application | IQUW Jul 2022- Present

- Using Figma to design and develop UI components, Implemented Highcharts for better visualization of data
- The technology stack used in this project includes React.js, Next.js, TypeScript, JavaScript, and Node.js
- Implementing CI/CD pipelines using Azure DevOps for streamlined code deployment.
